

**SecureCoat Lifetime Finish**

Introducing Hager Companies **SecureCoat** Lifetime Finish. Hager is offering a bright brass coating over stainless steel base material, which will truly last a Lifetime. Ask for Hager Companies – US3SC SecureCoat.

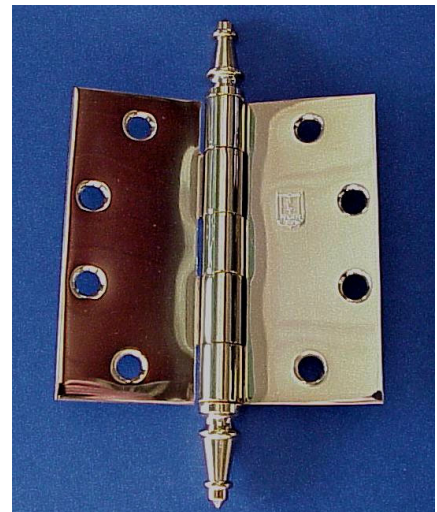

The process currently being used for **SecureCoat** is Physical Vapor Deposition, commonly referred to as PVD. This refers to a process in which the coating materials (Zirconium Nitride) are vaporized and then deposited on the surface of the hinge forming a solid material.

This coating alters the hinge to resist corrosion and wear properties of the original part. Field tests of over 8 months and laboratory tests of over 2000 hours of high salt content provided results of no tarnishing, blotching, flaking, or discoloration to the finish.

Whether for use in highly corrosive industrial applications or for your beachfront villa, the Hager Companies **SecureCoat** Lifetime Finish is the coating that will satisfy all your specification needs.

**Benefits & Features –**

- Lifetime warranty
- **Stainless Steel based** hinge with **SecureCoat**
- Durability of finish against:
  - Tarnishing            Flaking            Pitting
  - Discoloration        Chemicals        Blotching
- Environmental protection against
  - U/V Rays            Salt            Sand
- Aesthetical enhancement of the opening
- Decorative Tips available
  - Acorn                Ball
  - Steeple             Urn
- Special Packaging with Wood Screws
- Can be used on fire doors up to 3 hours

**SecureCoat available in:**

AB800	3.5 x 3.5	4 x 4	4.5 x 4	4.5 x 4.5	5 x 4	5 x 4.5	5 x 5
AB850	N/A	N/A	4.5 x 4	4.5 x 4.5	5 x 4	5 x 4.5	5 x 5
CB1191	3.5 x 3.5	4 x 4	4.5 x 4	4.5 x 4.5	5 x 4	5 x 4.5	5 x 5
